REDBIRD ANNOUNCES DATE AND LOCATION FOR MIGRATION 2023

The leading conference for flight training professionals will migrate to the EAA Aviation Museum in Oshkosh, Wisconsin, April 11-12, 2023.

Austin, TX (February 25, 2022) – Redbird Flight (Redbird) has announced that it will hold the 2023 Redbird Migration Flight Training Conference (Migration) at the Experimental Aircraft Association (EAA) Aviation Museum in Oshkosh, Wisconsin, April 11-12, 2023. The company selected the EAA Aviation Museum as the next venue for its conference to celebrate, highlight, and utilize the additions to the facility, which include a Youth Education Center and a 15,000 square-foot Pilot Proficiency Center.

The new Pilot Proficiency Center, which EAA plans to open to the public in May of this year, is a state-of-the-art skill building and training center for general aviation pilots. It combines relevant safety forums with challenging flight simulator training sessions to address critical safety issues.

The center will be open year-round to general aviation pilots, furthering the mission and successes of the pop-up proficiency center featured during the week of EAA AirVenture Oshkosh since 2016. Along with its partners – including Hartzell Propeller, Hartzell Engine Technologies, the Society of Aviation and Flight Educators, Bose Aviation, Jeppesen, CloudAhoy, the National Association of Flight Instructors, Community Aviation, Mindstar Aviation, the University of Maine at Augusta, and the National Air Traffic Controllers Association – Redbird has supported EAA in organizing the week-long program aimed at helping pilots increase their knowledge, hone their abilities, and network with their peers. Migration 2023 will be among the first events at the new Pilot Proficiency Center to promote and showcase how the training tools and activities it provides will help pilots improve and maintain their proficiency year-round.

Redbird introduced Migration in 2011, and the annual gathering quickly emerged as the leading conference for flight training professionals. Featuring presentations from a wide range of industry leaders and small group breakout sessions tailored to meet the goals of attendees, Migration provides solutions to the real-world problems facing flight training organizations, flight instructors, and their clients.
